

### **Pond, made of the old basin.**

Children make a pond of the old basin in their garden. At first they need to dig out a pit. A basin is put into it. Stones are put in a beautiful way around it. Some sand should be put into a basin and beautiful water plants should be planted in it. We shall plant beautiful flowers around our pond. After that we pour water into a pond and let fish swim in it. The pond is ready.
