

## THE PANFLUTE

5'00"

8.37 – 8.44

Bogdan is only 7... His hobbies are music and playing.

10.01 – 10.08

Today, his father will teach him something he learned from his father: how to make a panflute.

10.09 – 10.13

The best panflutes are made of bamboo wood.

10.22 – 10.28

Each and every piece is measured and set to form the panflute.

10.58 – 11.00

Now, the heavy work begins...

11.02 – 11.06

Every tube is processed on the inside and on the outside.

11.52 – 11.56

Then, the tubes are stuck together with some wooden strips ....

12.11 – 12.14

...and the panflute is ready to be dried.

12.43 – 12.51

To play the panflute, it needs to look good, so another series of processing begins.

13.07 – 13.21

The making of the sound is the most difficult operation. In every tube, a piece of wax is put to obtain the desired sound which is measured with a special device.

13.53 – 13.57

After the panflute is lacquered, it is ready for a concert.
