

“WHAT HAPPENS WITH MY LUGGAGE?”

01/40.01	Look, there's Tom and his mummy. They're going on holiday by plane.
01/40.06	First of all they have to check-in their luggage because it has to be loaded separately in the cargo hold.
01/40.11	Using their tickets labels are printed out which are a sort of passport for their suitcases to make sure they get loaded on the right plane.
01/40.21 01/40.23	There we are. The suitcase first goes to the sorting area.
01/40.27 01/4031	Tom and his mummy take a different route to get to the plane. What fun!
01/40.31	Why don't we have a look at what's happening in the sorting area?
01/40.34	Do you see those laser beams? They're coming out of this box. This allows the computer to read the labels.
01/40.39	The label of Tom's suitcase too.
01/40.43	The computer sends the data to the conveyor belt that will deliver the luggage to the right place...! Look for yourself!
01/40.48	Zoofff! All the suitcases that have to go on Tom's flight are loaded into this luggage cart.
01/40.54	And Tom and his mummy? They're still on their way to the plane.
01/41.58	Tom doesn't mind having to walk so far!

01/41.02	Come on... best foot forward!
01/41.03	They're nearly there. Just like their luggage in fact.
01/41.09	The captain is already in the cockpit. He's running through his final checks.
01/41.19	Ah ha! Tom and his mummy have arrived too! Time to take off!
01/41.26	Look, here comes the luggage cart.
01/41.29	Tom is relieved! He can see his suitcase!
01/41.36	While everyone boards, the suitcases are carefully loaded.
01/41.48	There you are. The door is firmly shut.
01/41.50	'Bye Tom! Have a nice holiday!
