

Sarah's butterfly

TC	Text
00:00	Hello Oli, Today I want to rear a butterfly with my father.
00:06	I'm Sarah.
00:09	Here, a butterfly has laid an egg.
00:13	And here the caterpillar has hatched.
00:17	The caterpillar is still really tiny, so tiny you can hardly see it with the naked eye. You need a microscope.
00:32	Here it is. Look, it's really hairy, and it's moving.
00:42	Now we're going to build a lovely nest for the caterpillar. It has to eat a lot of food to get big and fat – and turn into a pupa.
00:56	This is what it looks like when caterpillars pupate. They shed their skin, and under the last layer of skin is the chrysalis.
01:10	The chrysalis turns hard and the caterpillar is well hidden inside it.
01:17	Look, they look like leaves.
01:24	Our caterpillar has shed its skin too. Now it can take its time to turn into a butterfly.
01:37	Right, now I'll leave you in peace.
01:42	Here you can see a butterfly hatching. The caterpillar has become a completely different animal.
01:55	My butterfly has hatched too. My brother and I are eager to see what it looks like. ...It's taking its first steps ... but its not unfolding its wings yet ...
02:03	
02:14	Now! It can already fly!
02:25	Isn't it beautiful!
02:31	Now we can take the butterfly down to the field, where it will feel much more at home.
02:44	I'll call it Felix. I wonder if I'll see it again.
02:55	Bye, Felix.
