

I'M A BUG

code	Text
25:07	Gosh, it's so bright. Spring is almost here. So, what's new in this lovely old world? I <i>have to</i> find out. The sooner the better. If you join me, I'll tell you everything. You know, during the winter I was tucked away in the ground. But till now the sun has warmed up the ground. I recovered during the night. You know, we bugs can't do anything before we warm up.
25:30	Oh, no, I forgot to introduce myself. I'm a bug. There are many different types of bugs. I'm a reddish-black Heteroptera.
25:51	You know where I'm off to? Up that lime tree.
	I can't imagine us bugs living without lime trees. We do everything on foot. Believe me; walking gets you far, too.
26:25	Hello, sis'! Up already? Isn't this nice? The lime tree is the whole world for us.
26:39	But I got so hungry I couldn't stand it any longer. I'll show you what we eat.
26:53	This is a lime nut. It ripened in the autumn and fell off the tree. This is our favourite food, these lime nuts.
27:07	This is how we pierce them with our mouthpart and suck on them (<i>»cp-sssp«</i>).
27:13	Eh, leave me alone! This is <i>my</i> nut.
27:29	Find your own!
27:39	I found this one, but they'd all eat it.
27:52	I think it's best to eat it as quickly as possible. <i>»Cp-sssp«, »cp-sssp«...</i>
28:00	You know, it's our job to have youngsters. Easy piesy! First you

	find a male you like.
28:11	Then you get together, wait for a while...
28:21	... and then go and lay the eggs on the tree trunk. And that's it.
28:37	Youngsters grow up on their own. They suck on the sap from the lime tree bark. We, old are gradually slowing down. Time oasses so quickly; for bugs, too. So what. While still alive, I'm happy and content.
29:03	It's never boring in the company of others.
29:14	Have a nice time and come to see me again!
