OUR TRIP  
2.26 BLUE LAGOON

This item is a part of a series that was made this winter about places of interest in Iceland. Two boys travel around the country learning about some of the most beautiful places and some of the knowledge they have from a robot that appears on a computer screen when the boys need some pressing questions answered.

In this item the boys visit the Blue Lagoon on the south coast of the country. A place where people come to bathe in the lagoon and to experience the scenery.
