OUR TRIP
2.27 The Golden Waterfall

This item is a part of a series that was made this winter about places of interest in Iceland. Two boys travel around the country learning about some of the most beautiful places and some of the knowledge they have from a robot that appears on a computer screen when the boys need some pressing questions answered.

In this item the boys travel to Gullfoss, the Golden Waterfall. This is one of the largest waterfalls in Iceland. It has been a popular tourist spot for years.
