GPS YUCATÁN	Time in	Time out
Locators on at 21 degrees north and 88 degrees west where you find a cool place.	1:06:22:00	1:06:30:00
This is right in the middle of the Yucatan Peninsula where you find the most important cenotes in Mexico.	1:06:32:00	1:06:36:00
A cenote is a beautiful fresh water underground lagoon. Its waters are crystalline and generally blue or green.	1:06:38:00	1:06:44:00
You can swim peacefully there and watch the sun rays fall as well as fabulous stalactites and stalagmites.	1:06:46:00	1:06:53:00
Cenotes were considered sacred by the Mayas and they used to throw jewelry and other kinds of offerings just as you throw coins into fountains to have good luck.	1:06:55:00	1:07:04:00
A wonder of the world revealed in Mexico.	1:07:05:00	1:07:09:00
