TC 00,20

(Song) Grab the shovels...

TC 00,31

Two years ago, I had a dream
that I became an archeologist.

I also wrote a school
essay about it.

TC 00,41

When I was researching
about tombs, mummies

and secret tunnels in pyramids,

TC 00,50

I saw the symbol of
eternal life, ANKH.

TC 01,00

I got an excellent
mark for that essay

which means I got an excellent
mark in imagination.

TC 01,06

Then, Semir Osmanagic,
explorer, appeared and my dream

has come true. He claims
that the mountain Visocica

in my native town Visoko
is an ancient pyramid.

TC 01,29
The title:
100% PYRAMID

TC 01,33
This pyramid pizza
deserves excellent 5!

What? 5? It deserves
superior 10!

TC 02,13
You can take this bread, or maybe
you like this one more...

TC 02,42
There are scientists who
don't believe Semir.

They say there is no question
about pyramid here.

Still, people, experts and tourists
from the whole world come here.

But they have for sure,
something special to see here!

TC 03,03
I believe in pyramid at least 90% .
Together with my friends,

I am going to film the
proofs of its existence.

TC 03,14
In front of Semir and the pyramid,
the adults behave like children.

TC 03,20

This is an ongoing legitimate project,
therefore UNESCO, Egyptian experts,

as well as experts from Mexico
are going to come here.

TC 03,28

Hi! –Hi, children! How
are you? –My name is Belmin.

This is Irfan, Dino and Lejla.

Hi! –How are you, Irfan?
-Good.

Dino, don't fall down between the
blocks of pyramid. –Sure I won't.

Hi, Lejla. How are you?
-Good.

How come it doesn't look like
a pyramid? Where are the stairs?

We will find the stairs too.
These are the walls of the pyramid.

It goes up, over 200 metres.

All the megaliths
look like these.

These cracks here
were filled with

linking material for

these megaliths.

This pyramid weighs a several hundred of million of tones.

Is it the biggest pyramid in the whole world?

The biggest in the world!
-The biggest one, indeed!

Is it the oldest one too? –And most probably the oldest one

which can be found here on the surface of the Earth.

Is this a 100% pyramid?
Is it proven?

Is it possible to have only 80% or 30% pyramid? No.

It is either 0% or 100%.
This is a 100% pyramid.

TC 04,33
Ten million of Egyptians were building one pyramid only.

TC 05,21
I read everything I can find about pyramids.

I also read everything that Semir wrote about pyramids.

I exchange emails

with him regularly.

From my window

I can only see my Mum who
is taking care of the garden.

Here, take a look and film it!

I still think that the best way
to get to know me is to show

you my five, six...ten favorite secret
places where my friends and I play.

TC 05,51
Place number one...

TC 06,04
To start with: my friend
Irfan lives in the house

where he can look
directly at Egypt.

I am kidding, of course,
the Bosnian pyramid.

TC 06,16
His sister Lejla, who
likes English and history,

can see Mexico, Mexican
pyramid, as she says.

TC 06,31
If they weren't my friends,

I would have envied them
because of their room views.

TC 06,40
We cannot play in the garden
because of their dog Bruno.

Bruno bit Irfan three times.
It was Irfan's fault, of course.

TC 06,53
Number two: We play
mostly with boomerang

on the meadow looking
at the pyramid.

Irfan, throw it!
Throw it now!

I know the song which says:
«What goes around, comes around»!

Our boomerang won't, still won't,
but it has to come back some day.

TC 07,18
Here, watch Dino
throwing a boomerang...

TC 07,23
Watch Lejla....

TC 07,30
And now Belmin.
It's me, of course.

Number three:

Here you can see the archeological
site so called Plateau

where findings are sticking
out of the ground.

TC 08,01
I wonder who walked
over this pavement?

You got all excellent marks?
–Yes.

TC 08,16
Number 4: In this house, abandoned
and forgotten by its owners,

we dream and we fear
that one day, right here,

someone could build a big hotel.
Hotel that will make a lot of money

thanks to its wonderful view
over the Pyramid of the Sun.

Number five: Dino's Mum, makes
pyramid-shaped hairdoes...

Nefertiti style, you know.

She made us a Club

where we can train our
«boiling brains», as she says.

TC 08,51
I play a wall of illusion.

TC 08,55
Site number six: Abandoned
house of Dino's grandparents,

who passed away. This house everyone
in Visoko calls The Old House.

Now we can find only mice
and useless old things here.

There are a few hours
of our play also...

...until this house
falls down by itself.

Someone will excavate
it one day, I guess,

just like they excavate
the pyramid now.

(Song) Grab the shovels...

TC 09,33
Number seven: The
artefacts from the Museum.

Museums are just like ice-cream:
Cold and sweet secret places.

TC 09,45
We love our Museum
in Visoko where they keep

proofs about Bosnian kings.
Five kings altogether!

TC 09,55
And, here children, you
see replica of Stecak...

This is a Stecak made of plaster
in our Local Museum.

They keep the original
one in Sarajevo.

TC 10,07
So, we are here by the
Stecaks that you recognize so well,

don't you? –Yes.

TC 10,15
Experts in the National Museum
in Sarajevo believe

that there are no pyramids
in Bosnia.

These skeletons, as well as other
artifacts that have been displayed here,

witness that.

TC 10,29
How this skeleton could possibly
tell them something like that?

Experts trust skeletons
more than living Semir.

Filmed proofs from my mobile
will make them change their mind.

TC 10,45
Site number eight: The secret
passage to the pyramid.

Old people tell that there are
several tunnels like this one,

which lead to to the
top of the pyramid.

They are covered up with debris.

Miners and speleologists
excavate them.

We, children, are not
allowed to enter the tunnel.

However, Jasmin, our
cameraman, is allowed.

Below this plastic cover,
according to Semir,

there was one of
the entrances

into the world that
we've been exploring.

TC 11,24
Number nine: At the
top of the pyramid,

there are hardly visible remains

of the medieval town called Visoki.

I am wondering what
would have remained

of the thousand-year-old
pyramid

if this town disappeared
after only 800 years?

TC 11,42
We have found the proofs
of human existence here!

TC 11,57
Number ten:

At the top of the pyramid
there was the medieval town

which is proved but there
are no proofs of the pyramid.

Yet, there will be, for sure.

TC 12,09
All these sites that I showed
you have empowered us.

Mine is power of the Wind.
Let the wind blow!

Stop blowing!

My power is the power of Water
and everything related to it.

Rain, as well.
Let the rain start falling!

Rain, stop raining!
Stop it, Belmin!

I possess the power of Fire.
I control its devastating force.

I direct it towards
the force of Good.

I possess the power of Earth.

I control its spinning and
everything that moves on it.

Dino, who lives in phantasy,
is saying that all our powers

should be merged into one,
and we get the power of UR.

UR is a force which
controls the time.

But I think it helped explorers
to travel through time.

Explorers like:

Daniken, Clark, Carter, Schliemann...
and Semir Osmanagic.

Hello? –*Where are you?*
–At the top of the pyramid.

There is no pyramid.

-How come? Who says so?

There is a pyramid. 100%.

-*Yeah, it is.*

I'll get back to you later.

I am being filmed. -*Bye!*

Not only one pyramid exists.

There are five of them!

Who will excavate all of them?

I am tired of all this

fuss about pyramids!

THE END
