"100% PYRAMID"

#### SYNOPSIS

11-year-old Belmin adores history and adventure, especially ancient Egypt and the pyramids. One day an enthusiast explorer comes to his small native town Visoko and declares that the mountain Visocica bending over the city hides in itself an ancient pyramid even much much older than the Egyptian ones.

Belmin and his friends Lejla, Irfan and Dino are caught by a pyramid fever as well as all the other tourists and inhabitants of Visoko.

There are doubts among scientists that ancient pyramids could at all exist in the heart of Europe but Semir Osmanagic is 100% sure.

Belmin wants to film some proofs with his mobile phone at the archeological sites to support explorer's hypothesis.

Will he succeed?
