

MEETING OF TV YOUTH PROGRAMME EXPERTS

(Ponta Delgada, 12 to 15 November 2005)

USING THE QUEEN TO SCORE A GOAL!

Framework: Matej is an 11-year old boy, and by all appearances, he is just like other kids of his age. He is very vivacious, clever and he adores football. He and his father watch all games. Matej's younger brother is in a junior team, but Matej can only dream about playing football himself. Namely, Matej has an incurable disease - haemophilia. Therefore, he eagerly plays chess and is on a good way to become one of the best chess players in his category.
