FELICIA UPSIDE DOWN

Since 11-year-old Felicia was diagnosed with leukemia, her life has been upside down. Not only has she been subjected to gruelling treatments and lots of worry, she has also had to give up most of her leisure activities.

Most of all, Felicia longs to go horseback riding again, but to do that she needs to get stronger and show better blood values.

“Felicia Upside Down” documents Felicia’s recovery from a brutal illness. She is determined to get well enough to ride again before summer. The question is, will she be able to?
