

EUROPEAN PARLIAMENT

2004

2009

Committee on Industry, Research and Energy

2008/2099(INI)

6.6.2008

AMENDMENTS 1 - 123

Draft report
Patrizia Toia
(PE405.999v01-00)

Reaping the full benefits of the digital dividend in Europe: a common approach to the use of the spectrum released by the digital switchover
(2008/2099(INI))

AM_Com_NonLegReport

Amendment 1
Dragoş Florin David

Motion for a resolution
Recital A

Motion for a resolution

A. whereas the switchover from analogue to digital terrestrial television by the end of 2012 will as a result of the superior transmission efficiency of digital technology free up an unprecedented amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth,

Amendment

A. whereas the switchover from analogue to digital terrestrial television by the end of 2012 will as a result of the superior transmission efficiency of digital technology free up an unprecedented amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth **and the expansion of quality consumer services,**

Or. ro

Amendment 2
Anni Podimata

Motion for a resolution
Recital A

Motion for a resolution

A. whereas the switchover from analogue to digital terrestrial television by the end of 2012 **will** as a result of the superior transmission efficiency of digital technology free up **an unprecedented** amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth,

Amendment

A. whereas the switchover from analogue to digital terrestrial television by the end of 2012 **is expected** as a result of the superior transmission efficiency of digital technology **to** free up **a considerable** amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth,

Or. fr

Amendment 3
Herbert Reul

Motion for a resolution
Recital A

Motion for a resolution

A. whereas the switchover from analogue to digital terrestrial television by the end of 2012 will as a result of the superior transmission efficiency of digital technology free up ***an unprecedented*** amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth,

Amendment

A. whereas ***it is expected that*** the switchover from analogue to digital terrestrial television by the end of 2012 will as a result of the superior transmission efficiency of digital technology free up ***a significant*** amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth,

Or. en

Amendment 4
Alexander Alvaro, Jorgo Chatzimarkakis

Motion for a resolution
Recital A

Motion for a resolution

A. whereas the switchover from analogue to digital terrestrial television by the end of 2012 will as a result of the superior transmission efficiency of digital technology free up ***an unprecedented*** amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth,

Amendment

A. whereas ***it is expected that*** the switchover from analogue to digital terrestrial television by the end of 2012 will as a result of the superior transmission efficiency of digital technology free up ***a significant*** amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth,

Or. en

Amendment 5
Silvia-Adriana Țicău

Motion for a resolution
Recital A

Motion for a resolution

A. whereas the switchover from analogue to digital terrestrial television by the end of 2012 will as a result of the superior transmission efficiency of digital technology free up *an unprecedented* amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth,

Amendment

A. whereas the switchover from analogue to digital terrestrial television by the end of 2012 will as a result of the superior transmission efficiency of digital technology free up *a significant* amount of spectrum in the European Union, thus offering the possibility of reallocating spectrum and presenting new opportunities for market growth,

Or. ro

Amendment 6
Paul Rübzig

Motion for a resolution
Recital A a (new)

Motion for a resolution

Amendment

Aa. whereas the benefits of the use of radio spectrum will be maximised through coordinated action at EU level in order to ensure optimal use in terms of efficiency,

Or. en

Amendment 7
David Hammerstein

Motion for a resolution
Recital A a (new)

Motion for a resolution

Amendment

Aa. whereas the benefits of the use of the radio spectrum will be maximised through

coordinated action at EU level in order to ensure optimal use from a combined social and economic perspective,

Or. en

Amendment 8
Atanas Paparizov

Motion for a resolution
Recital A a (new)

Motion for a resolution

Amendment

Aa. whereas the benefits of the use of the radio spectrum will be maximised through coordinated action at EU level in order to ensure optimal use from a combined social and economic perspective,

Or. en

Amendment 9
Patrizia Toia

Motion for a resolution
Recital A a (new)

Motion for a resolution

Amendment

Aa. whereas the benefits of the use of the radio spectrum will be maximised through coordinated action at EU level in order to ensure optimal use from a combined social and economic perspective,

Or. en

Amendment 10
Anni Podimata

Motion for a resolution
Recital C

Motion for a resolution

C. whereas spectrum ***shortage has been an obstacle to the deployment of new services***, and its efficient use is critical in ensuring access to spectrum for the various interested parties which want to offer services,

Amendment

C. whereas spectrum ***is both a scarce natural resource and a public asset***, and its efficient use is critical in ensuring access to spectrum for the various interested parties which want to offer services,

Or. fr

Amendment 11
Silvia-Adriana Țicău

Motion for a resolution
Recital C

Motion for a resolution

C. whereas ***spectrum shortage has been an obstacle to the deployment of new services***, and its efficient use is critical in ensuring access to spectrum for the various interested parties which want to offer services,

Amendment

C. whereas ***spectrum remains a limited resource***, and its efficient use is critical in ensuring access to spectrum for the various interested parties which want to offer services,

Or. ro

Amendment 12
Herbert Reul

Motion for a resolution
Recital C

Motion for a resolution

C. whereas spectrum ***shortage has been an obstacle to the deployment of new services***, and its efficient use is critical in

Amendment

C. whereas spectrum ***remains a scarce natural resource*** and its efficient use is critical in ensuring access to spectrum for

ensuring access to spectrum for the various interested parties which want to offer services,

the various interested parties which want to offer services,

Or. en

Amendment 13
Alexander Alvaro, Jorgo Chatzimarkakis

Motion for a resolution
Recital C

Motion for a resolution

C. whereas spectrum ***shortage has been an obstacle to the deployment of new services***, and its efficient use is critical in ensuring access to spectrum for the various interested parties which want to offer services,

Amendment

C. whereas spectrum ***remains a scarce natural resource*** and its efficient use is critical in ensuring access to spectrum for the various interested parties which want to offer services,

Or. en

Amendment 14
Anni Podimata

Motion for a resolution
Recital C a (new)

Motion for a resolution

Ca. whereas broadcasters have shown good faith in the efficient use of spectrum by driving forward the digital switchover with significant investment in digital radio and television technology and programming,

Amendment

Or. en

Amendment 15
Herbert Reul

Motion for a resolution
Recital C a (new)

Motion for a resolution

Amendment

Ca. whereas broadcasters have shown commitment to efficient use of spectrum by driving forward the digital switchover with heavy investment in digital radio and television technology and programming,

Or. en

Amendment 16
Alexander Alvaro, Jorgo Chatzimarkakis

Motion for a resolution
Recital C a (new)

Motion for a resolution

Amendment

Ca. whereas broadcasters have shown commitment to efficient use of spectrum by driving forward the digital switchover with heavy investment in digital radio and television technology and programming,

Or. en

Amendment 17
Francisca Pleguezuelos Aguilar

Motion for a resolution
Recital D

Motion for a resolution

Amendment

D. whereas efficient use of spectrum also serves the cultural objectives of EU policies ***and should facilitate cultural and linguistic diversity as well as*** media

D. whereas efficient use of spectrum also serves the cultural objectives of EU policies, ***and the digital dividend, apart from information society and mobile telephony services, should also facilitate***

pluralism,

cultural diversity as regards audiovisual content, multilingualism and media pluralism,

Or. es

Amendment 18
Silvia-Adriana Țicău

Motion for a resolution
Recital E a (new)

Motion for a resolution

Amendment

Ea. whereas the Commission communication COM(2007)0700 entitled 'Reaping the full benefits of the digital dividend in Europe: a common approach to the use of the spectrum released by the digital switchover' is an integral part of the package on electronic communications adopted by the Commission in November 2007 concerning the reform of the regulatory framework for communications;

Or. ro

Amendment 19
Paul Rübzig

Motion for a resolution
Recital E a (new)

Motion for a resolution

Amendment

Ea. whereas in Europe the (re-)allocation of broadcast frequencies to digital broadcasters is currently under way in many Member States with the consequence of these frequencies being allocated and thereby locked away for many years,

Amendment 20
David Hammerstein

Motion for a resolution
Recital E a (new)

Motion for a resolution

Amendment

Ea. whereas technological neutrality is key to the promotion of interoperability and essential to a more flexible and transparent digital switchover policy for the consideration of the public interest,

Or. en

Amendment 21
Erna Hennicot-Schoepges

Motion for a resolution
Recital E a (new)

Motion for a resolution

Amendment

Ea. whereas the Council has called on the Member States, as far as possible, to complete the switchover to digital before 2012,

Or. fr

Amendment 22
Erna Hennicot-Schoepges

Motion for a resolution
Recital E b (new)

Motion for a resolution

Amendment

Eb. whereas all the Member States have published their proposals concerning the

switchover to digital,

Or. fr

Amendment 23
Paul Rübzig

Motion for a resolution
Paragraph 1

Motion for a resolution

1. Recognises the importance of the i2010 initiative as part of the renewed Lisbon Strategy, and emphasises the importance of efficient access to and use of spectrum in achieving the Lisbon goals;

Amendment

1. Recognises the importance of the i2010 initiative as part of the renewed Lisbon Strategy, and emphasises the importance of efficient access to and use of spectrum in achieving the Lisbon goals; ***stresses in this context the need for access to broadband services in order to overcome the "digital divide"***;

Or. en

Amendment 24
Alyn Smith

Motion for a resolution
Paragraph 1 a (new)

Motion for a resolution

1a. Deplores the uneven access of European citizens to digital services, particularly in broadcasting; notes that rural and peripheral regions are especially disadvantaged (in promptness, choice and quality) with regard to the rollout of digital services; urges Member States and regional authorities to do all in their power to ensure that the digital switchover is conducted quickly and fairly for all their citizens;

Or. en

Amendment 25
Pilar del Castillo Vera

Motion for a resolution
Paragraph 1 a (new)

Motion for a resolution

Amendment

1a. Notes that achieving leadership in broadband and Internet development is crucial for Europe's competitiveness at international level, and highlights the especial importance of developing interactive digital platforms and providing new services such as e-trade, e-health, e-learning and e-government services;

Or. en

Amendment 26
Gunnar Hökmark

Motion for a resolution
Paragraph 2

Motion for a resolution

Amendment

2. Urges the Member States ***to agree on a common timetable and*** to release their digital dividends as quickly as possible, allowing European citizens to benefit from the deployment of new, innovative and competitive services;

2. Urges the Member States to release their digital dividends as quickly as possible, allowing European citizens to benefit from the deployment of new, innovative and competitive services;

Or. en

Amendment 27
Francisca Pleguezuelos Aguilar

Motion for a resolution
Paragraph 2

Motion for a resolution

2. Urges the Member States to agree on a common timetable and to release their digital dividends as quickly as possible, **allowing** European citizens to benefit from the deployment of new, innovative and competitive services;

Amendment

2. Urges the Member States to agree on a common timetable and to release their digital dividends as quickly as possible, **taking account of the various specific decisions previously adopted by the Member States which allow** European citizens to benefit from the deployment of new, innovative and competitive services;

Or. es

Amendment 28
Nikolaos Vakalis

Motion for a resolution
Paragraph 2

Motion for a resolution

2. Urges the Member States to agree on a **common** timetable and to release their digital dividends as quickly as possible, allowing European citizens to benefit from the deployment of new, innovative and competitive services;

Amendment

2. Urges the Member States to agree on a timetable **which will take account of the various possibilities of each Member State** and to release their digital dividends as quickly as possible, allowing European citizens to benefit from the deployment of new, innovative and competitive services;

Or. el

Amendment 29
Dragoş Florin David

Motion for a resolution
Paragraph 2

Motion for a resolution

2. Urges the Member States to agree on a common timetable and to release their digital dividends as quickly as possible, allowing European citizens to benefit from

Amendment

2. Urges the Member States to agree on a common timetable and to release their digital dividends as quickly as possible, allowing European citizens to benefit from

the deployment of new, innovative and competitive services;

the deployment of new, innovative, *efficient* and competitive services;

Or. ro

Amendment 30
Herbert Reul

Motion for a resolution
Paragraph 3

Motion for a resolution

3. Believes that the digital dividend *opens up sufficient spectrum for* broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband applications designed to overcome the so-called “digital divide”;

Amendment

3. Believes that the digital dividend *should provide an opportunity to* broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband applications designed to overcome the so-called “digital divide”;

Or. en

Amendment 31
Anni Podimata

Motion for a resolution
Paragraph 3

Motion for a resolution

3. Believes that the digital dividend opens up sufficient spectrum *for* broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband applications designed to overcome the so-called “digital divide”;

Amendment

3. Believes that the digital dividend opens up sufficient spectrum, *offering* broadcasters *a significant opportunity to* significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband applications designed to overcome the so-called “digital divide”, *in keeping with public interest objectives*;

Or. fr

Amendment 32
Silvia-Adriana Țicău

Motion for a resolution
Paragraph 3

Motion for a resolution

3. Believes that the digital dividend ***opens up sufficient spectrum*** for broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband applications designed to overcome the so-called 'digital divide';

Amendment

3. Believes that the digital dividend ***should provide an opportunity*** for broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband applications designed to overcome the so-called 'digital divide'; ***considers that Member States need to ensure that rural areas, where the 'digital divide' is most evident, can derive greater benefits and be given priority in terms of the opportunities opened up by the digital dividend;***

Or. ro

Amendment 33
David Hammerstein

Motion for a resolution
Paragraph 3

Motion for a resolution

3. Believes that the digital dividend opens up sufficient spectrum for broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband applications designed to overcome the so-called “digital divide”;

Amendment

3. Believes that the digital dividend opens up sufficient spectrum for broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband applications designed to overcome the so-called “digital divide”, ***while not allowing interoperability barriers and vendor capture;***

Or. en

Amendment 34
Gunnar Hökmark

Motion for a resolution
Paragraph 3

Motion for a resolution

3. Believes that the digital dividend opens up sufficient spectrum for broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband **applications** designed to overcome the so-called “digital divide”;

Amendment

3. Believes that the digital dividend opens up sufficient spectrum for broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as **new** broadband **technologies and access services**, designed to overcome the so-called “digital divide”;

Or. en

Amendment 35
Werner Langen

Motion for a resolution
Paragraph 3

Motion for a resolution

3. Believes that the digital dividend opens up sufficient spectrum for broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as broadband applications designed to overcome the so-called ‘digital divide’;

Amendment

3. Believes that the digital dividend opens up sufficient spectrum for broadcasters to significantly develop and expand their services and at the same time to take into account other potential social, cultural and economic applications, such as **mobile** broadband applications designed to overcome the so-called ‘digital divide’;

Or. de

Amendment 36
David Hammerstein

Motion for a resolution
Paragraph 3 a (new)

Motion for a resolution

Amendment

3a. Emphasises, with regard to spectrum management, the general principles of technology and service neutrality in order to promote competition; points out that spectrum should be managed in a manner which is flexible and transparent and which facilitates cultural and linguistic diversity, freedom of expression, and media pluralism and takes into account the technical, social, cultural and political needs of all Member States;

Or. en

Amendment 37
Zdzisław Kazimierz Chmielewski

Motion for a resolution
Paragraph 3 a (new)

Motion for a resolution

Amendment

3a. Urges the Member States to step up measures to enable disabled and elderly users and users with special social needs to make the most of the benefits provided by the digital dividend;

Or. pl

Amendment 38
Mary Honeyball

Motion for a resolution
Paragraph 3 a (new)

Motion for a resolution

Amendment

3a. Stresses that the "digital divide" is not just a rural issue; highlights the difficulty in fitting some older high-rise buildings with the infrastructure for new networks; underlines the benefit that spectrum can play in overcoming the "digital divide" in both urban and rural areas;

Or. en

Amendment 39
Angelika Niebler

Motion for a resolution
Paragraph 3 a (new)

Motion for a resolution

Amendment

3a. Points out that the digital dividend opens up a substantial amount of spectrum, which could in particular be used to improve provision of wireless broadband services in rural areas and remote regions;

Or. de

Amendment 40
Gunnar Hökmark

Motion for a resolution
Paragraph 4

Motion for a resolution

Amendment

4. Underlines the potential benefits of a coordinated usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-optimal use of this

4. Underlines the potential benefits of a coordinated **approach to** usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-

scarce resource;

optimal use of this scarce resource;

Or. en

Amendment 41

Silvia-Adriana Țicău

Motion for a resolution

Paragraph 4

Motion for a resolution

4. Underlines the potential benefits of a coordinated usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-optimal use of this scarce resource;

Amendment

4. Underlines the potential benefits of a coordinated usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-optimal use of this scarce resource; ***considers that, while closer coordination and greater flexibility are necessary for efficient exploitation of the spectrum, the Commission and the Member States need to strike an appropriate balance between flexibility and the degree of harmonisation, with a view to deriving maximum benefit from the digital dividend;***

Or. ro

Amendment 42

Dragoș Florin David

Motion for a resolution

Paragraph 4

Motion for a resolution

4. Underlines the potential benefits of a coordinated usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-optimal use of this

Amendment

4. Underlines the potential benefits of a coordinated usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-optimal use of this

scarce resource;

scarce resource *and the fact that this potential benefit is especially important for mobile services;*

Or. en

Amendment 43
Paul Rübige

Motion for a resolution
Paragraph 4

Motion for a resolution

4. Underlines the potential benefits of a coordinated usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-optimal use of this scarce resource;

Amendment

4. Underlines the potential benefits of a coordinated usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-optimal use of this scarce resource; *and that this potential benefit is especially important for mobile services;*

Or. en

Amendment 44
Werner Langen

Motion for a resolution
Paragraph 4

Motion for a resolution

4. Underlines the potential benefits of a coordinated usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-optimal use of this scarce resource;

Amendment

4. Underlines the potential benefits of a coordinated usage of spectrum in the EU in terms of economies of scale, as well as the need to make the best use of the digital dividend in order to avoid fragmentation, which leads to a sub-optimal use of this scarce resource *and would jeopardise the development of mobile broadband services;*

Amendment 45
Pilar del Castillo Vera

Motion for a resolution
Paragraph 4 a (new)

Motion for a resolution

Amendment

4a. Welcomes the efforts that some Member States have shown on switching to digital broadcasting and/or identifying their digital dividend; calls upon Member States to release their digital dividend without undue delay in order to enable Europe to take advantage of new, innovative and competitive services;

Or. en

Amendment 46
Herbert Reul

Motion for a resolution
Paragraph 5

Motion for a resolution

Amendment

5. Stresses that the main guiding principle in the allocation of the digital dividend should be ensuring the best social, cultural and economic value in terms of an enhanced and geographically wider offer of services and digital content to citizens, **and not only maximising public revenues;**

5. Stresses that the main guiding principle in the allocation of the digital dividend should be ensuring the best social, cultural and economic value in terms of an enhanced and geographically wider offer of services and digital content to citizens;

Or. en

Amendment 47
Alexander Alvaro, Jorgo Chatzimarkakis

Motion for a resolution
Paragraph 5

Motion for a resolution

5. Stresses that the main guiding principle in the allocation of the digital dividend should be ensuring the best social, cultural and economic value in terms of an enhanced and geographically wider offer of services and digital content to citizens, **and not only maximising public revenues;**

Amendment

5. Stresses that the main guiding principle in the allocation of the digital dividend should be ensuring the best social, cultural and economic value in terms of an enhanced and geographically wider offer of services and digital content to citizens;

Or. en

Amendment 48
Silvia-Adriana Țicău

Motion for a resolution
Paragraph 5

Motion for a resolution

5. Stresses that the main guiding principle in the allocation of the digital dividend should be ensuring the best social, cultural and economic value in terms of an enhanced and geographically wider offer of services and digital content to citizens, and not only maximising public revenues;

Amendment

5. Stresses that the main guiding principle in the allocation of the digital dividend should be **to serve the general interest by** ensuring the best social, cultural and economic value in terms of an enhanced and geographically wider offer of services and digital content to citizens, and not only maximising public revenues;

Dragoş Florin David

Motion for a resolution
Paragraph 9

Motion for a resolution

9. Encourages Member States to take into account the **appropriateness** of allowing unlicensed users access to the dividend, in particular small and medium-sized enterprises and the not-for-profit sector;

Amendment

9. Encourages Member States to take into account **the social, cultural and economic value** of allowing unlicensed users access to the dividend, in particular small and medium-sized enterprises and the not-for-profit sector;

Or. en

Amendment 64
Silvia-Adriana Țicău

Motion for a resolution
Paragraph 9

Motion for a resolution

9. Encourages Member States to **take into account** the appropriateness of allowing unlicensed users access to the dividend, in particular small and medium-sized enterprises and the not-for-profit sector;

Amendment

9. Encourages Member States to **consider** the appropriateness of allowing unlicensed users access to the dividend, in particular small and medium-sized enterprises and the not-for-profit sector;

Or. ro

Amendment 65
David Hammerstein

Motion for a resolution
Paragraph 9 a (new)

Motion for a resolution

Amendment

9a. Calls on Member States to support enhanced cooperation measures between spectrum management authorities to consider areas where unlicensed white

space spectrum allocation would allow new technologies and services to emerge so as to foster innovation;

Or. en

Amendment 66
David Hammerstein

Motion for a resolution
Paragraph 9 a (new)

Motion for a resolution

Amendment

9a. Encourages Member States to consider in the context of white space allocation the needs for unlicensed open access to spectrum by non-commercial and educational service providers and local communities which are driven by a public service mission;

Or. en

Amendment 67
Zdzisław Kazimierz Chmielewski

Motion for a resolution
Paragraph 9 a (new)

Motion for a resolution

Amendment

9a. Stresses that one of the key elements when seeking to provide access to the digital dividend for unlicensed users is the need to take account of the needs of social groups threatened with exclusion, particularly disabled and elderly users and users with special social needs;

Or. pl

Amendment 68
Mary Honeyball

Motion for a resolution
Paragraph 9 a (new)

Motion for a resolution

Amendment

9a. Recognises the benefit of new technologies, such as WiFi and Bluetooth, that have emerged in the unlicensed 2,4 GHz band; recognises that different frequencies are best suited for different services; believes that allocating a small amount of unlicensed spectrum in other lower frequencies could encourage yet more innovation in new services;

Or. en

Amendment 69
Paul Rübiger

Motion for a resolution
Paragraph 10 a (new)

Motion for a resolution

Amendment

10a. Encourages the Member States to assess in detail the social and economic value of any spectrum freed up in the upcoming years by the switchover from analogue to digital broadcast;

Or. en

Amendment 70
Herbert Reul

Motion for a resolution
Paragraph 11

Motion for a resolution

Amendment

11. Recognises the ***contribution*** of the ITU

11. Recognises the ***importance*** of the ITU
